# WILA AirPower Series

Tool up with the  
WILA AirPower Series.

Now available: the  
complete range of  
WILA's pneumatic tool  
holders, top and bottom,  
Pro and Premium.

Speed up operations  
and tool changes  
– and maximize  
productivity.

6-8  
bar

**WILA  
AirPower  
Series**

## **Your #NEXTSTEP in press brake productivity**

With the WILA AirPower Series you can boost your press brake productivity, while using a full pneumatic clamping system. Thanks to our patented Self-Locking® mechanism, WILA AirPower Series ensures superior clamping performance. Tools are clamped and unclamped extremely fast and tight, using only regular workshop air pressure of 6-8 bar – without the need for expensive pressure boosters. It's time to grow your business with the WILA AirPower Series.

## **With patented Self-Locking® performance**

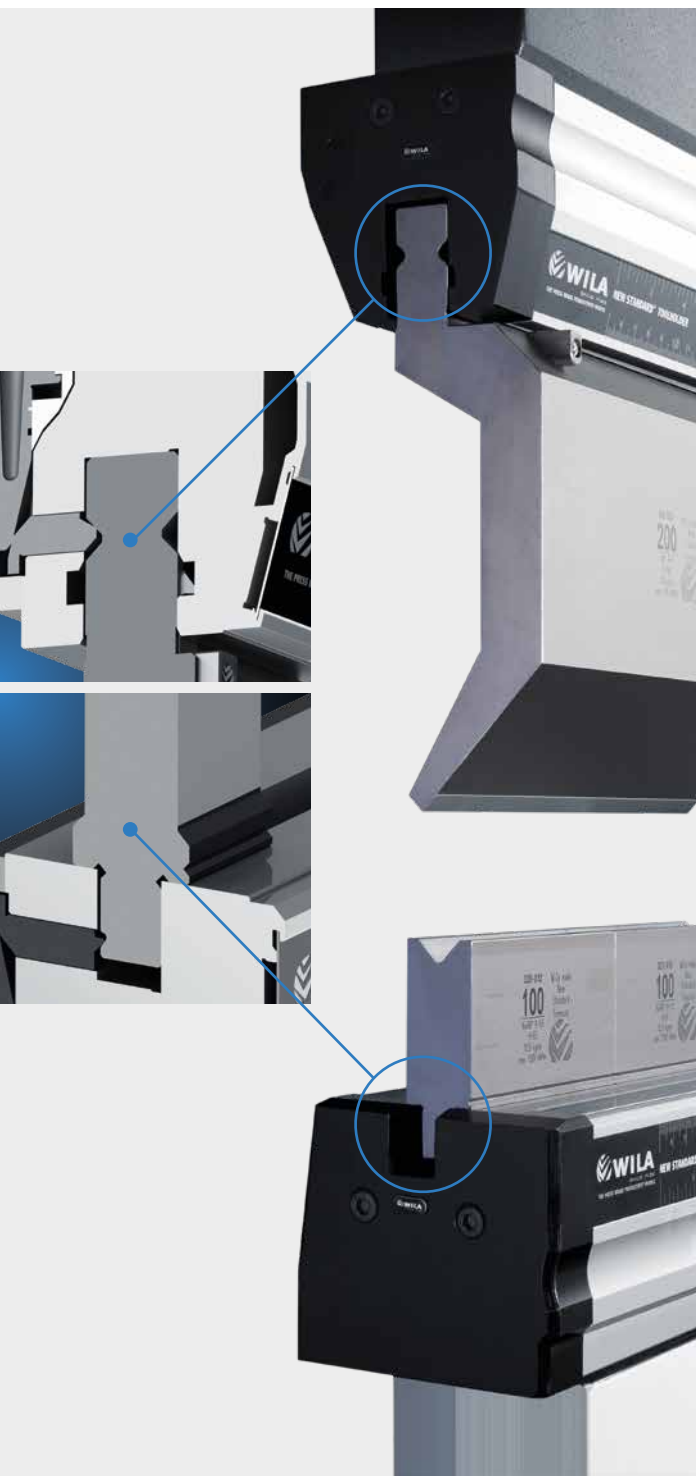

Tools are clamped using a pneumatically-controlled pair of self-adjusting wedges. When the wedges are engaged (clamped), they become an integral part of the tool. The Self-Locking principle is suitable for clamping WILA's New Standard top and bottom tools (BIU and OZU). The Premium clamping is also released pneumatically.

## **V-Lock®**

**A groove at the back of the tool tang is used to automatically align bottom tools along X and Y axis, and to firmly clamp them in place.**

# Pneumatic clamping with WILA AirPower Series

- No oil, no hydraulics
- For top and bottom tooling
- No pressure booster needed (6-8 bar will do)
- Ultrafast clamping for more productivity
- Lower operating costs
- Cleaner, more sustainable
- For new and existing press brakes

## Lean, clean and green

No longer a niche, electric press brakes are becoming increasingly popular. Thanks to our patented Self-Locking® mechanism, electric press brakes with WILA AirPower pneumatics deliver a complete and powerful all-round clamping performance. Easier to maintain, oil-free machines are cleaner and more sustainable, using less energy as they are only running when operating.

## Simplicity is a force

The WILA AirPower Series runs on air not oil. And as these pneumatic clamps operate on normal workshop air pressure, there's no need for expensive pressure boosters. Our unique innovation means set-up is faster, easier and more efficient. Isn't it time to grow your business with the WILA AirPower Series?

**The WILA AirPower Series is now available – a complete range of pneumatic tool holders, top and bottom, Pro and Premium.**

Together we will find the perfect solution for your bending projects. Get in touch with us: [www.wila.nl](http://www.wila.nl)

# WILA THE PRESS BRAKE PRODUCTIVITY PEOPLE

WILA fully concentrates on the development of products and solutions to optimize the productivity of your press brake.

WILA has been producing clamping and crowning systems as well as tools and accessories to improve set-up times and increase the precision of your press brake for decades. Through close cooperation with the world's leading press brake manufacturers, an extensive and competent distribution network, in-house development, sales and production, WILA is the right partner to fulfill your needs.
